

Cybersecurity Maturity Model Certification Training

What Is a Certified CMMC-AB Licensed Training Provider?

The Cybersecurity Maturity Model Certification-Accreditation Body (CMMC-AB) established an approved Licensed Training Providers (LTPs) network of Provisional Instructors (PIs) to deliver training to those who want to obtain Certified CMMC Professional and/or Certified CMMC Assessor certifications.

Why Choose Cerberus Sentinel?

Cerberus is a certified CMMC-AB LTP. The CMMC-AB considers only training provided by LTPs as valid for preparing for the CMMC-AB certifications. Our instructors are CMMC-AB certified PIs. They were required to go through a rigorous training process, followed by passing knowledge-based and performance-based examinations. This also included completing aggressive Provisional Assessor training to gain comprehensive knowledge about the CMMC Framework, validated by passing the certification examination. Additionally, they bring decades of experience in assessment and training.

We are currently scheduling the following classes:

CMMC Level 1 Self-Assessment Training (3 days)

Designed to provide students with the necessary knowledge to self-assess at Level 1 of the CMMC model. Note: This course does not provide a certification option with the CMMC-AB. Course materials are provided by an accredited Licensed Partner Publisher (LPP), as required by CMMC-AB.

Certified CMMC Professional Training (5 days)

Designed to prepare aspiring CMMC assessors for CMMC-AB's Certified CMMC Professional Examination. According to the CMMC-AB, this class is a CMMC-model specific "gateway class" that covers the CMMC model, the assessment guides, and how to practically interpret the CMMC model. Students are required to complete this course to be eligible to take the CMMC Certified Professional Examination. Course materials are provided by an accredited LLP, as required by CMMC-AB.
