MANAGED DETECTION & RESPONSE

Endpoints Are More Vulnerable Than Ever Before

With the amount of remote workers in today's business environment, your endpoints are as vulnerable as ever to the risk of cyber attacks. To protect your systems, you need to stop attacks at the endpoint level before they can spread to your entire network. That means updating your endpoint protection strategies to include technology capable of handling such a high-risk threat landscape.

How SentryMDR Protects You

SentryMDR unifies prevention, detection, and response in a seamless service technology offering powered by certified analysts, machine learning, and automation.

“Your Team came highly recommended to us, and we appreciate the peace of mind we have knowing they are monitoring our endpoints 24x7.”

-Quek Song, Vice President of IT

You'll get:

- Prevention and detection of attacks across all major vectors
- Rapid elimination of threats
- Fully automated, policy-driven response capabilities
- Complete visibility into the endpoint environment
- Full-context, real-time forensics

Combining these capabilities with our around-the-clock, certified and highly trained security personnel for alert validation and remediation, SentryMDR is a comprehensive threat management solution for your endpoints.
